## 1 Legal Basis

This detailed guidance is intended to provide advice on the application format and contents of a request to the competent authority (CA) in any EU Member State for:

- Authorisation of a clinical trial on a medicinal product for human use;
- Notifications of substantial proposed amendments; and
- Declaration of the end of the clinical trial.

The legal basis is Directive 2001/20/EC, which should be read in conjunction with this detailed guidance and other Commission Directives and detailed guidance on the Directive as well as the Member States implementing legislation.

## 2 Scope

Article 9.8 of the Directive requires the Commission, in consultation with Member States, to draw up and publish detailed guidance on:

- (a) the format and contents of the request to conduct a clinical trial on a medicinal product for human use as well as the documentation to be submitted to support that request on the quality and manufacture of the investigational medicinal product, any toxicological and pharmacological tests, the protocol and clinical information on the investigational medicinal product including the investigator's brochure;
- (b) the presentation and content of notifications of substantial proposed amendments to the protocol;
- (c) the declaration of the end of the clinical trial.

Directive 2001/20/EC applies to all investigational medicinal products, including the following types of product:

- Chemical entities;
- Biotechnology products;
- Cell therapy products;
- Gene therapy products;
- Plasma derived products;
- Other extractive products;
- Immunological medicinal products (such as: vaccines, allergens, immune sera);
- Herbal medicinal products;
- Radiopharmaceutical products; and
- Homeopathic products.

This detailed guidance should be followed unless justified in an application to the CA of the Member State in which the trial will take place.

## 3 Definitions

The definitions of Directive 2001/20/EEC are applicable. An authorisation of a clinical trial by the competent authority of a Member State will be a Clinical Trial Authorisation (CTA) and will only be valid for a clinical trial conducted in that Member State. This authorisation does not imply approval of the development programme of the tested IMP.

## **4 Format and content of applications and notifications**

### **4.1 Request for a clinical trial authorisation**

The applicant must submit a valid request for authorisation to the competent authority. The list in attachment 1 indicates the core information and Member State specific information to be submitted as part of a valid application. The sponsor should provide the CA with a list of competent authorities to which they have already made the same application with details of their decisions and a copy of the opinion of the ethics committee in the MS concerned as soon as it is available. When an ethics committee responsible for giving a single opinion in a MS gives an unfavourable opinion the sponsor should inform the CA of the MS where he has applied for authorisation of the trial and provide them with a copy of the unfavourable opinion. When relevant, the sponsor should check the language requirements with the concerned competent authority before preparing the application. If the applicant is not the sponsor, they should enclose a letter from the sponsor authorising the applicant to act on their behalf. If an application is not valid the CA will inform the applicant and give the reasons.

The sponsor should make applications to fulfill the requirements of other Directives that relate to clinical trials with IMPs where applicable. For example if the IMP is a genetically modified micro-organism (GMO) it may be necessary to obtain permission for its contained use or deliberate release in accordance with Directives 90/219/EC<sup>1</sup> and/or Directive 2001/18/EC<sup>2</sup> from the relevant competent authority in the MS concerned.

#### **4.1.1 Covering Letter**

The applicant should submit and sign a covering letter with the application. Its heading should contain the EudraCT number and the sponsor protocol number with a title of the trial. The text should draw attention to any special issues related to the application such as special trial populations, first administration of a new active substance to humans, unusual investigational medicinal products (IMPs), unusual trial designs etc. and indicate where the relevant information is in the application.

---

<sup>1</sup> Directive 90/219/EC as amended by Directive 98/81/EC on the contained use of genetically modified organisms (GMOs)

<sup>2</sup> Directive 2001/18/EC of the European Parliament and of the council of 12 march 2001 on the deliberate release into the Environment of genetically modified organisms and repealing Council Directive 90/220/EEC 31 May 2001.

#### **4.1.2 Allocation of the EudraCT number**

Before submitting an application to the CA, the sponsor should obtain a unique EudraCT number from the EudraCT database by the procedure described in the detailed guidance on the European clinical trials database<sup>3</sup>. This number will identify the protocol for a trial whether conducted at a single site or at multiple sites in one or more member states. To obtain the EudraCT number automatically from the database the applicant will need to provide a few items of information. However they will need to complete all the relevant parts of the form before submitting an application to the CA.

#### **4.1.3 Application form**

The application form can be accessed via the internet by the procedure described in Commission detailed guidance on the EudraCT database. Annex 1 shows the information required to complete the form. The application form should uniquely identify the clinical trial and the organisations and key individuals responsible for the conduct of the trial. Some of the information in the form, such as contact person and name of the investigator, will be relevant in one Member State only. The applicant should print the completed form, sign and date it, and send it as part of the application to the CA of each Member State where he intends to conduct the trial. The applicant's signature will confirm that the sponsor is satisfied that, a) the information provided is complete, b) the attached documents contain an accurate account of the information available, c) in their opinion it is reasonable for the proposed clinical trial to be undertaken, and d) any information provided to both the CA and the ethics committee concerned is based on the same data. The sponsor should save the core data set as an XML file using the utilities feature linked to the form on its webpage and send a copy of this XML file, on a disk, with the application.

#### **4.1.4 Protocol**

The content and format of the protocol should comply with the guidance in the Community guideline on Good Clinical Practice (CPMP/ICH/135/95). The version submitted should include all currently authorised amendments and a definition of the end of the trial. It should be identified by the title, a sponsor's code number specific for all versions of it, a number and date of version that will be updated with the inclusion of amendments, and by any short title or name assigned to it, and be signed by the sponsor and principal investigator (or co-ordinating investigator for multicentre trials).

Among other things, it should include:

- The evaluation of the anticipated benefits and risks as required in Article 3(2)(a);
- A justification for including subjects who are incapable of giving informed consent or other special populations; and
- A description of the plan for the provision of any additional care of the subjects once their participation in the trial has ended, where it differs

---

<sup>3</sup> Detailed guidance on the European clinical trials database (EudraCT Database)

from what is normally expected according to the subject's medical condition.

#### **4.1.5 Investigators Brochure**

The content, format and procedures for updating the Investigator's Brochure (IB) should comply with the Community guideline on Good Clinical Practice (CPMP/ICH/135/95). It should be prepared from all available information and evidence that supports the rationale for the proposed clinical trial and the safe use of the investigational medicinal product (IMP) in the trial and be presented in the format of summaries.

If the IMP is marketed in any MS and its pharmacology is widely understood by medical practitioners, the sponsor can provide a simplified IMP dossier (see table 1) and an extensive investigators brochure may not be necessary.

#### **4.1.6 Investigational Medicinal Product Dossier (IMPD)**

The IMPD should give information on quality of any IMP to be used in the clinical trial, including reference products and placebos. It should also provide data from non-clinical studies and the previous clinical use of the IMP or justify in the application why information is not provided. Some Member States may require other information (see attachment 1).

The applicant may either provide a stand alone IMPD or cross-refer to the IB for the pre-clinical and clinical parts of the IMPD. In the latter case, the summaries of pre-clinical information and clinical information should include data, preferably in tables, providing sufficient detail to allow assessors to reach a decision about the potential toxicity of the IMP and the safety of its use in the proposed trial. If there is some special aspect of the pre-clinical data or clinical data that requires a detailed expert explanation or discussion beyond what would usually be included in the IB, the sponsor should submit the pre-clinical and clinical information as part of the IMP dossier.

##### *4.1.6.1 Full IMPD*

This section indicates the type of scientific information that is required for a full IMPD and how it should be presented. The sponsor should submit a full IMPD when they have not previously submitted any information about that chemical or biological product to the competent authority concerned and cannot cross-refer to information submitted by another sponsor. For instance, when the sponsor does not have a marketing authorisation for the IMP in any MS of the Community and the CA concerned has not granted them a CTA previously and they cannot cross-refer to the relevant information in another sponsor's application for the same product.

A full IMPD should include summaries of information related to the quality, manufacture and control of the IMP, data from non-clinical studies and from its clinical use. It is preferable to present data in tabular form accompanied by the briefest narrative highlighting the main salient points. The dossier should not generally be a large document, however for trials

with certain types of IMP exceptions can be agreed with the Member State(s) concerned.

Sponsors should preface the IMPD with a detailed table of contents and a glossary of terms. Where possible data should be provided under the headings and arranged in the order given in The Rules Governing Medicinal Products in the European Union Volume 2, Notice to Applicants Volume 2B Presentation and Content of the Dossier, Common Technical Document which can be accessed at the Commission website [www.pharmacos.eudra.org](http://www.pharmacos.eudra.org). The headings are not mandatory nor are they an exhaustive list. The major headings are listed in attachments 2, 3 and 4 for ease of reference. If there is no appropriate heading a new section may be added.

However, it is recognised that it will be inappropriate or impossible to provide information under all headings for all products. The dossier required will depend on many factors including the nature of the medicinal product, the stage of development, the population to be treated, the nature and severity of the disease and the nature and duration of exposure to the investigational medicinal product. Where it is necessary to omit data for reasons that are not obvious, scientific justification should be provided.

It is impossible to formulate detailed guidance to cover all situations. Sponsors are advised to use this detailed guidance as a starting point in their preparation of data packages for submission. In addition, the relevant Community guideline or European Commission decision should be followed for specific types of investigational medicinal product, clinical trial, or patient group. This type of information is available at the European Medicines Evaluation Agency (EMA) website [www.emea.eu.int](http://www.emea.eu.int).

#### *4.1.6.1.1 Quality data*

The sponsor should submit summaries of chemical, pharmaceutical and biological data on any IMP. They should provide the information under the headings in Attachment 2 where it is available. The Directive requires sponsors to supply IMPs for a clinical trial whose manufacture complies with the principles of Good Manufacturing Practice (GMP) set out in Directive 2003/94/EC for IMPs and the guidance on application of the principles set out in Annex 13 (revised July 2003) to the Community Guide to GMP.

#### *4.1.6.1.2 Non-clinical pharmacology and toxicology data*

The sponsor should also provide summaries of non-clinical pharmacology and toxicology data for any IMP to be used in the clinical trial or justify why they have not. They should also provide a reference list of studies conducted and appropriate literature references. Full data from the studies and copies of the references should be made available on request. Wherever appropriate it is preferable to present data in tabular form accompanied by the briefest narrative highlighting the main salient points. The summaries of the studies conducted should allow an assessment of the adequacy of the study and whether the study has been conducted according to an acceptable protocol. Sponsors should as far as possible provide the

non-clinical information in the full IMPD under the headings in attachment 3. The headings are not mandatory nor are they an exhaustive list.

This section should provide a critical analysis of the available data, including justification for deviations and omissions from the detailed guidance and an assessment of the safety of the product in the context of the proposed clinical trial rather than a mere factual summary of the studies conducted.

The studies needed as a basis for the non-clinical section of the full IMPD are outlined in the relevant Community guidelines. In particular, applicants are referred to the Community guideline<sup>4</sup> (CPMP/ICH/286/95). These and other relevant guidelines are available from the EMEA website [www.emea.eu.int](http://www.emea.eu.int).

All studies should be conducted according to currently acceptable state-of-the-art protocols. In addition, they should meet the requirements of Good Laboratory Practice where appropriate. The sponsor should justify any deviations from these principles and provide a statement of the GLP status of studies.

The test material used in the toxicity studies should be representative of that proposed for clinical trial use in terms of qualitative and quantitative impurity profiles. The preparation of the test material should be subject to appropriate controls to ensure this and thus support the validity of the study.

#### *4.1.6.1.3 Previous clinical trial and human experience data*

This section should provide summaries of all available data from previous clinical trials and human experience with the proposed IMP(s) in this section. They should as far as possible provide the information under the headings in attachment 4. The headings are not mandatory nor are they an exhaustive list.

All studies should have been conducted in accordance with the principles of Good Clinical Practice (GCP). This should be confirmed by the sponsor in a statement of the GCP status of all studies and where this is not the case, he should provide an explanation or justification if available.

There are no specific requirements for data from clinical studies that must be provided before a clinical trial authorisation can be granted. However applicants should take account of the general guidance on clinical trials in the development of a medicinal product in the Community guideline (CPMP/ICH/291/95)<sup>5</sup>. These and other relevant guidelines are available from the EMEA website [www.emea.eu.int](http://www.emea.eu.int).

---

<sup>4</sup> Community guideline ‘Note for guidance on non-clinical safety studies for the conduct of human clinical trials for pharmaceuticals’(CPMP/ICH/286/95)

<sup>5</sup> ‘Note for guidance on general considerations for clinical trials (CPMP/ICH/291/95)’

#### *4.1.6.1.4 Overall risk and benefit assessment*

This section should provide a brief integrated summary that critically analyses the non-clinical and clinical data in relation to the potential risks and benefits of the proposed trial. The text should identify any studies that were terminated prematurely and discuss the reason(s). Any evaluation of foreseeable risks and anticipated benefits for studies on minors or incapacitated adults should take account of the provisions of the Directive.

The aim of the non-clinical pharmacology and toxicity testing is to indicate the principal hazards of a new medicinal product. The sponsor should use the relevant pharmacology, toxicology and kinetic results as the basis of extrapolation to indicate possible risks in humans. As a guide to what may occur in humans, the sponsor should integrate all the available data, analyse the pharmacological and toxic actions of the IMP and use the results to suggest possible mechanisms and the exposure required to produce them. Where appropriate, they should discuss safety margins in terms of relative systemic exposure to the investigational medicinal product, preferably based on AUC and C<sub>max</sub> data, rather than in terms of applied dose. They should also discuss the clinical relevance of any findings in the non-clinical and clinical studies along with any recommendations for further monitoring of effects and safety in the clinical trials.

#### *4.1.6.2 Simplified IMPD*

##### *4.1.6.2.1 When to use a simplified IMPD*

A simplified IMPD may be submitted if information related to the IMP has been assessed previously as part of a marketing authorisation (MA) in any MS of the Community or as part of a clinical trial application to the CA concerned. Information on a placebo may also be provided as a simplified IMPD. The text should include a discussion of the potential risks and benefits of the proposed trial (see section 4.1.6.1.4). Guidance on the types of previous assessment and the associated categories of information required is provided in Table 1. This may require a letter of authorisation to cross-refer to the data submitted by another applicant. In addition, an appropriate and adapted content of the IMP dossier may be allowed occasionally by the competent authority, provided that it is justified and agreed before the application is submitted.

**Table 1. Reduced information requirements for IMPs known to the concerned competent authority**

Types of Previous Assessment	Quality Data	Non-clinical Data	Clinical Data
The IMP has a MA in any EU Member State and is used in the trial: <input type="checkbox"/> Within the conditions of the SmPC <input type="checkbox"/> Outside the conditions of the SmPC <input type="checkbox"/> With a change to the drug substance manufacture or manufacturer <input type="checkbox"/> After it has been blinded	SmPC SmPC S+P+A  P+A	SmPC Yes (if appropriate) SmPC <sup>6</sup>  SmPC	SmPC Yes (if appropriate) SmPC  SmPC
Another pharmaceutical form or strength of the IMP has a MA in any EU Member State and: <input type="checkbox"/> the IMP is supplied by the MAH	P+A	Yes	Yes
The IMP has no MA in any EU Member State but drug substance is part of product with a marketing authorisation in a MS and: <input type="checkbox"/> is supplied from the same manufacturer <input type="checkbox"/> is supplied from another manufacturer	P+A S+P+A	Yes Yes	Yes Yes
The IMP has a previous CTA in the Member State(s) concerned <sup>7</sup> : <input type="checkbox"/> no new data available since CTA <input type="checkbox"/> new data available since CTA	No New Data	No New Data	No New Data
The IMP is a placebo	P+A	No	No

(S: Drug substance data; P : Drug product data; A : appendices of the IMPD; SmPC: summary of product characteristics)

#### 4.1.6.2.2 Marketed products

The sponsor may submit the current version of the SmPC as the IMPD if an IMP has a marketing authorisation in any Member State in the EU and is being used in the same form, for the same indications and with a dosing regimen covered by the SmPC. It will also be sufficient for studies of dosing regimens not covered by the SmPC when the sponsor can show that the information in the SmPC justifies the safety of the proposed new regimen. Otherwise they should submit additional non-clinical data and/or clinical data to support the safety of its use in the new indication, new patient population and the new dosing regimen as appropriate. If the applicant is the marketing authorisation holder and he has submitted an application to vary the SmPC which has not yet been authorised, the nature of the variation and the reason for it should be explained in the covering letter.

There are situations where the IMP to be used in the CT has a MA in the MS concerned but the protocol allows that any brand of the IMP with an MA in that MS may be administered to the trial subjects. In those

<sup>6</sup> Where the change to drug substance manufacture produces a new potentially toxic substance such as a new impurity or degradation product or introduces a new material in the production of a biological product, additional non-clinical information may be required.

<sup>7</sup> This may require a letter of authorisation to cross-refer to the data submitted by another applicant.

situations, it is acceptable that the trade names of IMPs to be used are not identified, for instance:

- a) A sponsor may wish to conduct a trial with an active substance that is available in the Community in a number of medicines with MAs and different trade names. In which case, the protocol may define the treatment in terms of the active substance only and not specify the trade name of each product. This is to allow investigators to administer any brand name of these products that contains the active substance in the required pharmaceutical form with an MA in the MS concerned. To notify this, they should complete Section D1b of the application form and in Section D2 they should provide the name routinely used to describe the product in the protocol under 'Product Name' and the name of the active substance.
- b) In some trials the sponsor may wish to allow investigators in the same multicentre trial to administer different regimens of IMPs, e.g. groups of anticancer drugs, according to local clinical practice at each investigator site in the MS. They should define the acceptable treatment regimens in the protocol and notify this in the application form by completing Section D1b and in Section D2 they should provide the name routinely used to describe the regimen in the protocol under 'Product Name' and the name of each active substance.
- c) In other trials the sponsor may wish to study the effect of a number of treatments on a specific illness without specifying the IMPs to be used. To achieve this he should identify the treatment using its ATC Code (level 3-5) in the protocol and complete Section D1b and D2 of the application form.

## **4.2 Notification of amendments**

### **4.2.1 Scope**

Article 10 of the Directive allows amendments to be made to the conduct of a clinical trial after its commencement. It does not require notification of non-substantial amendments; only amendments that are substantial must be notified to the CA and ethics committee concerned (see Section 4.2.3). In addition when a sponsor and/or investigator must take urgent safety measures to protect the trial subjects from immediate hazard Article 10(b) allows them to do so before notifying the CA, but they must notify them forthwith.

### **4.2.2 Non-substantial amendments**

The sponsor does not have to notify non-substantial amendments to the documentation provided to the competent authority or the ethics committee i.e. those that are not 'substantial' as indicated by the criteria in 4.2.3. However, they should be recorded and be available on request for inspection at the trial site and/or the sponsors premises as appropriate.

### **4.2.3 Substantial amendments**

Substantial amendments to the conduct of the clinical trial may arise from changes to the protocol or from new information relating to the scientific documents in support of the trial. Amendments to the trial are regarded as “substantial” where they are likely to have a significant impact on:

- the safety or physical or mental integrity of the subjects;
- the scientific value of the trial;
- the conduct or management of the trial; or
- the quality or safety of any IMP used in the trial.

In all cases, an amendment is only to be regarded as “substantial” when the above criteria are met. Attachment 5 provides headings of aspects of a trial to which a sponsor might need to make a substantial amendment. Not all amendments to those aspects of a trial need to be notified, only those that meet the criteria of “substantial” above. Also the list is not exhaustive; a substantial amendment might occur in some other aspect of a trial.

#### **4.2.4 Procedure for notification**

Substantial amendments to the information supporting the initial authorisation of the trial or to the protocol should be reported using the Amendment Notification Form at Annex 2<sup>8</sup>. The sponsor should first assess on a case-by-case basis whether or not an amendment is substantial using criteria from 4.2.3 above and the list of headings in attachment 5. Where a substantial amendment affects more than one protocol for a particular investigational medicinal product, the sponsor may make a single notification to the competent authority concerned, provided that the covering letter and notification includes a list of all affected protocols with their EudraCT numbers.

The sponsor or his legal representative in the Community should also submit a covering letter and sign it. Its heading should contain the EudraCT number and the sponsor protocol number with the title of the trial and an amendment number. The text should draw attention to any special issues related to the amendment and indicate where the relevant information or text is in the original application. The covering letter should identify any information not in the Notification of Amendment that might impact on the risk to trial participants.

In the case of substantial amendments that affect information submitted to both the competent authority and the ethics committee, the sponsor should make the notifications in parallel. For substantial amendments to information that only the CA assesses (e.g. quality data in most of the MS), the sponsor should not only submit the amendment to the CA but also inform the ethics committee that they have made the application. Similarly, the sponsor should inform the CA of any substantial amendment to information for which only the ethics committee is responsible (e.g. facilities for the trial). To provide this information it should be sufficient to

---

<sup>8</sup> This procedure should also be followed to report substantial amendments to the relevant ethics committee. See detailed guidance on the application format and documentation to be submitted in an application for an Ethics Committee opinion on the clinical trial on medicinal products for human use.

submit the amendment notification form (Annex 2) indicating in the first page that it is “for information”.

When a sponsor proposes to change the co-ordinating investigator, the principal investigator at a trial site or add a new site for a clinical trial he should notify the CA and the relevant ethics committee. He can meet this obligation by submitting a Notification of Amendment (Annex 2) and completing section F. The investigator at the new site should not enter participants into the trial until the ethics committee has given a favourable opinion and according to MS regulation the CA has indicated it has no grounds for non-acceptance in response to the notification.

Applicants should be aware that these procedures set out to provide for rapid and efficient processing of substantial amendments, and in that context, unsatisfactory documentation is likely to lead to a refusal of the amendment. Refusals do not prejudice the applicant’s right to resubmission.

#### **4.2.5 Format and content of notification**

The notification of a substantial amendment should include the following information:

- a) Covering letter, including reason for qualification as a substantial amendment.
- b) Application form (Annex 2) that contains:
  - identification of CT (title, EudraCT number, sponsor’s protocol code number);
  - identification of applicant;
  - identification of the amendment (sponsor’s amendment number and date). One amendment could refer to several changes in the protocol or scientific supporting documents;
  - description of the amendment and reason.
- c) An extract of the modified documents showing previous and new wording, where applicable
- d) The new version of modified documents where the changes are so widespread and/or substantial that they justify a new version, identified with updated number of version and date.
- e) Supporting information including
  - summaries of data, if applicable;
  - an updated overall risk benefit assessment, where applicable;
  - possible consequences for subjects already included in the trial;
  - possible consequences for the evaluation of the results.
- f) Where applicable, if a substantial amendment changes the core data in the XML file accompanying the initial application for the trial, the sponsor should submit a revised copy of the XML file with the Notification of

Amendment, incorporating amended data. The application for substantial amendment should identify the fields to be changed, by attaching a print out of the revised form showing the amended fields highlighted.

#### **4.2.6 Implementation**

The sponsor may implement a substantial amendment if the ethics committee opinion is favourable and the CA has raised no grounds for non-acceptance. For amendments submitted to either the ethics committee alone or the CA alone, the sponsor may implement the amendment if the ethics committee opinion is favourable or the CA has raised no grounds for non-acceptance respectively.

#### **4.2.7 Time for response**

Article 10 of the Directive requires an ethics committee to give an opinion on a proposed substantial amendment within 35 days. It does not set out a period within which the competent authority must respond to such a notification. However, as guidance, the amendment may be implemented after 35 days from the receipt of a valid notification of an amendment if the CA has not raised grounds for non-acceptance. However, if the CA consults a group or committee in accordance with Article 9.4 of the Directive, the time for response could be extended. In this case the CA should notify the sponsor of the duration of the extension.

#### **4.2.8 Urgent Amendments**

Article 10 (b) requires a sponsor and investigator to take appropriate urgent safety measures to protect subjects against any immediate hazard where new events relating to the conduct of the trial or the development of the IMP are likely to affect the safety of the subjects. These safety measures such as temporarily halting of the trial may be taken without prior authorisation from the competent authority. The sponsor must inform the competent authority and the ethics committee concerned of the new events, the measures taken and their plan for further action as soon as possible. This should be by telephone in the first place followed by a written report. When the sponsor halts a clinical trial (stops recruitment of new subjects and/or interrupts the treatment of subjects already included in the trial), they should notify the CA and ethics committee concerned within 15 days using the form at annex 3. They may not recommence the trial in that MS until the ethics committee has given a favourable opinion and the CA has not raised grounds for non-acceptance of the recommencement.

#### **4.2.9 Suspension of a trial by the Competent Authority**

The CA may suspend or prohibit a clinical trial in the member state concerned where it has objective grounds for considering that the conditions in the authorisation are not being met or has doubts about the safety or scientific validity of the clinical trial. Before they reach their decision, they must inform the sponsor, except where there is imminent risk, and ask the sponsor and/or the investigator for their opinion. The sponsor should immediately investigate the grounds for suspension or

prohibition and provide a report within one week addressing the issues raised and any exceptional circumstances that might have led to those conditions not being met. When the CA suspends a trial, they must inform the other competent authorities, the ethics committee concerned, the EMEA and the Commission. If the trial is terminated following a suspension, the sponsor should notify the CA using the declaration of end of trial form at Annex 3.

#### **4.2.10 Infringements**

Where the CA has objective grounds for considering the sponsor or investigator or any other person involved in the conduct of the trial no longer meets the obligations laid down, the CA may set a course of action that a sponsor must take to remedy any infringement of those obligations. The course of action should have a timetable for its implementation and a date when the sponsor should report back to the CA on the progress and completion of its implementation. The CA must inform the other competent authorities, the ethics committee concerned and the Commission of this course of action.

In these circumstances the sponsor should immediately implement the course of action set by the CA and report to the CA and the ethics committee concerned on the progress and completion of its implementation in accordance with the timetable set.

### **4.3 Declaration of the end of a clinical trial**

#### **4.3.1 Legal Basis and Scope**

Article 10 (c) of Directive 2001/20/EC requires the sponsor of a clinical trial to notify the competent authority of the Member State concerned that the clinical trial has ended.

#### **4.3.2 Procedure for declaring the end of the trial**

The definition of the end of the trial should be provided in the protocol and any change to this definition for whatever reason should be notified as a substantial amendment. In most cases it will be the date of the last visit of the last patient undergoing the trial. Any exceptions to this should be justified in the protocol.

The sponsor should make an end of trial declaration using the form at Annex 3 when:

- the trial ends in the territory of the Member State(s) concerned;
- the complete trial has ended in all participating centres in all countries within and outside the Community.

The sponsor must notify the end of the trial within 90 days of the end of the clinical trial. Whenever a trial is terminated early the sponsor must notify the competent authority(ies) concerned within 15 days and clearly explain the reasons.

If the sponsor decides not to commence the trial initially or not to recommence the trial after halting it, they should notify the competent authority(ies) concerned using the form at Annex 3. They do not have to expedite the notification but should submit a letter that should identify the protocol, its sponsor's protocol code number and EudraCT number and provide a brief explanation of the reasons for not starting the trial or for ending it.

The sponsor should also provide a summary of the clinical trial report within one year of the end of the trial to the competent authority of the Member State(s) concerned as required by the regulatory requirement(s) and to comply with the Community guideline on Good Clinical Practice (CPMP/ICH/135/95). The format of this summary should comply as much as possible with annex 1 of the Community guideline on the Structure and Content of Clinical Study Reports (CPMP/ICH/137/95).

If a new event occurs after the termination of the trial that is likely to change the risk/benefit analysis of the trial and could still have an impact on the trial participants, the sponsor should notify the competent authority concerned and provide a proposed course of action.

#### **4.3.3 Format and content**

The declaration of the end of the trial should be notified using the form at Annex 3.

The following information should be provided:

- Name and address of the sponsor or his legal representative in the Member State;
- Title of the trial;
- EudraCT number;
- Sponsor's protocol code number;
- Date of end of trial in the Member State concerned;
- Date of end of complete trial in all participating centres in all countries when available.

When the trial is terminated early, the end of clinical trial report should also provide the following information:

- Justification of the premature ending or of the temporary halt of the trial;
- Number of patients still receiving treatment at time of study termination;
- Proposed management of patients receiving treatment at time of halt or study termination;
- Consequences for the evaluation of results.

## MEMBER STATES ADDITIONAL EXPLANATION

The letters (e.g. A.B.C.) preceding information below refer to letters under the MS column in the table above and provide additional explanation about the information to be provided. The asterisks (\*) refer to asterisks in the table above and provide comments from MS for discussion.

### **Belgium:**

- A. With the waiver laid down by the provisions of this guideline;
- B. If available;
- C. On request.

### **Finland:**

- A. IB is only necessary when the product has no MA .

### **France:**

- A. If not in the IMPD

### **Greece:**

- A. I.B. is only necessary when the product has no MA;
- B. CV from the principal investigator.

### **Hungary:**

- A. Certificate of analysis for test product required in every case.

### **Ireland:**

- A. Full listing of names/addresses of members of Ethics Committee;

### **Latvia:**

- A. On request. In all cases the list of the countries where application has been submitted;
- B. In all cases certificate of analysis for the test product should be submitted;
- C. On request.

### **Lithuania:**

- A. For authorised products in Lithuania, for others according to the Directive 2001/20/EC “in at least the official language on the outer packaging of investigational medicinal products or where there is no outer packaging, on the immediate packaging”.

### **Luxembourg:**

- A. If available ;
- B. On request.

### **Norway:**

- A. The application form specific to the ethics committee in Norway should be sent to NoMA
- B. A copy of the authorisation is not required by NoMA, but the authorisation needs to be obtained from another authority.
- C. To be determined

### **Portugal :**

- A. List of investigators;
- B. With letter declaring conflicts of interest.

### **Spain:**

- A. investigational medicinal products requiring a full IMPD will require the qualification as "Producto en investigación Clínica" (PEI) basically on the basis of the IMPD document;
- B. The notification of ethics committee favourable opinion and agreement of the management board of the site would be necessary before the authorisation takes place.

### **UK**

- A. On request

## **Attachment 5: Headings for aspects of a trial to which a sponsor might wish to make a substantial amendment.**

In all cases, an amendment is only to be regarded as “substantial” where they are likely to have a significant impact on:

- the safety or physical or mental integrity of the patients;
- the scientific values of the trial;
- the conduct or management of the trial;
- the quality or safety of any IMP used in the trial.

The headings below are examples of aspects of a trial where amendments may need to be made, of which only some need to be notified as substantial. There may be other aspects of the trial where amendments meet the criteria for substantial.

### **Amendments related to the protocol**

Purpose of trial  
Design of trial  
Informed consent  
Recruitment procedure  
Measures of efficacy  
Schedule of samples  
Addition or deletion of tests or measures  
Number of participants  
Age range of participants  
Inclusion criteria  
Exclusion criteria  
Safety monitoring  
Duration of exposure to the investigational medicinal product(s)  
Change of posology of the investigational medicinal product(s)  
Change of comparator  
Statistical analysis

### **Amendments related to the trial arrangements**

Change of the principal investigator or addition of new ones  
Change of the co-ordinating investigator  
Change of the trial site or addition of new sites (See section 4.2.3 on how to notify changes)  
Change of the sponsor or legal representative  
Change of the CRO assigned significant tasks  
Change of the definition of the end of the trial

### **Amendments related to the IMP**

Changes to investigational medicinal product quality data concerning:  
Change of name or code of IMPs

Immediate packaging material  
Manufacturer(s) of active substance  
Manufacturing process of the active substance  
Specifications of active substance  
Manufacture of the medicinal product  
Specification of the medicinal product  
Specification of excipients where these may affect product performance  
Shelf-life including after first opening and reconstitution  
Major change to the formulation  
Storage conditions  
Test procedures of active substance  
Test procedures of the medicinal product  
Test procedures of non-pharmacopoeial excipients

**Changes to non-clinical pharmacology and toxicology data where this is relevant to the ongoing trials (i.e. altered risk:benefit assessment).**

For example concerning:

Results of new pharmacology tests  
New interpretation of existing pharmacology tests  
Result of new toxicity tests  
New interpretation of existing toxicity tests  
Results of new interaction studies

**Changes to clinical trial and human experience data where this is relevant to the ongoing trials (i.e. altered risk:benefit assessment).**

For example concerning:

Safety related to a clinical trial or human experience with the investigational medicinal product  
Results of new clinical pharmacology tests  
New interpretation of existing clinical pharmacology tests  
Results of new clinical trials  
New interpretation of existing clinical trial data  
New data from human experience with the investigational medicinal product  
New interpretation of existing data from human experience with the investigational medicinal product

## Annex 1: Application Form

<b>REQUEST FOR AUTHORISATION OF A CLINICAL TRIAL ON A MEDICINAL PRODUCT FOR HUMAN USE TO THE COMPETENT AUTHORITIES AND FOR OPINION OF THE ETHICS COMMITTEES IN THE COMMUNITY</b>
--

*For official use:*

Date of receiving the request :	Date of request for additional information :	Grounds for non acceptance/ negative opinion : yes <input type="checkbox"/> no <input type="checkbox"/> If yes, date :
Date of request for information to make it valid :		
Date of valid application :	Date of receipt of additional / amended information :	Authorisation/ positive opinion : yes <input type="checkbox"/> no <input type="checkbox"/> If yes, date :
Date of start of procedure:		
Competent authority, Ethics Committee registration number :		

*To be filled in by the applicant:*

This form is common for request for authorisation from the Competent Authority and for the opinion from an Ethics Committee. Please indicate the relevant purpose in a box below.

**REQUEST FOR AUTHORISATION TO THE COMPETENT AUTHORITY:**

**REQUEST FOR OPINION OF THE ETHICS COMMITTEE:**

### A. TRIAL IDENTIFICATION

<b>Member State in which the submission is being made :</b>
---

EudraCT number <sup>1</sup>
Full title of the trial :
Sponsor's protocol code number, version, and date <sup>2</sup> :
Name or abbreviated title of the trial where available:

ISRCTN number <sup>3</sup> , if available :
---

<sup>1</sup> Append the EudraCT number confirmation receipt

<sup>2</sup> Any translation of the protocol should be assigned the same date and version as those in the original document.

<sup>3</sup> International Standard Randomised Controlled Trial Number

## B. IDENTIFICATION OF THE SPONSOR RESPONSIBLE FOR THE REQUEST

### B1. Sponsor

Name of organisation :  
 Name of the person to contact:  
 Address :  
 Telephone number :  
 Fax number :  
 e-mail:

### B2. Legal representative<sup>4</sup> of the sponsor in the Community for the purpose of this trial (if different from the sponsor)

Name of organisation:  
 Name of the person to contact :  
 Address :  
 Telephone number :  
 Fax number :  
 e-mail:

Status of the sponsor : commercial<sup>5</sup>  non commercial

## C. APPLICANT IDENTIFICATION, (please tick the appropriate box)

C1. Request for the competent authority	<input type="checkbox"/>	C2. Request for the Ethics Committee	<input type="checkbox"/>
- Sponsor	<input type="checkbox"/>	- Sponsor	<input type="checkbox"/>
- Legal representative of the sponsor	<input type="checkbox"/>	- Legal representative of the sponsor	<input type="checkbox"/>
- Person or organisation authorised by the sponsor to make the application. In that case, complete below:	<input type="checkbox"/>	- Person or organisation authorised by the sponsor to make the application. In that case, complete below:	<input type="checkbox"/>
- Organisation :		- Organisation :	
- Name of contact person :		- Name of contact person :	
- Address :		- Address :	
- Telephone number :		- Telephone number :	
- Fax number :		- Fax number :	
- E-mail		- E-mail :	
		- Investigator in charge of the application :	
		• Coordinating investigator (for multicentre trial)	<input type="checkbox"/>
		• Principal investigator (for single centre trial)	<input type="checkbox"/>
		In the case of the investigator, complete below :	
		- Name :	
		- Address :	
		- Telephone number :	
		- Fax number :	
		- E-mail :	

<sup>4</sup> : In accordance with article 19 of Directive 2001/20/EC

<sup>5</sup> : A commercial sponsor is a person or organisation that takes responsibility for a trial which at the time of the application is part of the development programme for a marketing authorisation of a medicinal product.

**D. INFORMATION ON INVESTIGATIONAL MEDICINAL PRODUCT(S) BEING USED IN THE TRIAL : MEDICINAL PRODUCT BEING TESTED OR USED AS A COMPARATOR**

*Information on each ‘Bulk product’ before trial-specific operations (blinding, trial specific packaging and labelling) should be provided in this section for both the medicinal product being tested and the product being used as a comparator. Information on placebo, if relevant, should be provided in section E. If the trial is performed with several investigational medicinal products (IMP), use extra pages and give each IMP a sequential number ; information should be given for each product, likewise if the product is a combination product information should be given for each active substance.*

Indicate which of the following is described below, then repeat as necessary for each of the numbered IMPs to be used in the trial(assign numbers from 1-n):

**This refers to the IMP number : (.....)**

**IMP being tested**

**IMP used as a comparator**

**D.1. STATUS OF THE INVESTIGATIONAL MEDICINAL PRODUCT TO BE USED IN THE TRIAL**

D.1(a) Has the IMP to be used in the trial a marketing authorisation (MA) :	Yes	No	If yes, specify for the product to be used in the trial		
			Trade name <sup>6</sup>	Name of the MA holder <sup>6</sup>	MA number <sup>6</sup>
<ul style="list-style-type: none"> <li>In the Member State concerned by this submission?                             <ul style="list-style-type: none"> <li>If yes to this question and if the IMP is not modified but the trade name and MA holder are not fixed in the protocol, go to D.1(b)</li> </ul> </li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>			
If no to the previous question, <ul style="list-style-type: none"> <li>in another Member State from which it is sourced for this trial?                             <ul style="list-style-type: none"> <li>If yes specify,                                     <ul style="list-style-type: none"> <li>in which Member State?</li> </ul> </li> </ul> </li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>			
If no to the 2 previous questions, <ul style="list-style-type: none"> <li>in a third country from which it is sourced for this trial?                             <ul style="list-style-type: none"> <li>If yes, in which country?</li> </ul> </li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>			

<sup>6</sup> Available from the Summary of Product Characteristics

<b>D.1(b) Situations where the IMP to be used in the CT has a MA in the MS concerned but the protocol allows that any brand of the IMP with a MA in that MS be administered to the trial subjects and it is not possible to clearly identify the IMP(s) in advance of the trial start:</b>	Yes	No
In the protocol, is treatment defined only by active substance? - if yes, go to D2	<input type="checkbox"/>	<input type="checkbox"/>
In the protocol, treatment regimens allow different combinations of marketed products used according to local clinical practice at some or all investigator sites in the MS. - if yes, go to D2.	<input type="checkbox"/>	<input type="checkbox"/>
The products to be administered as IMPs are defined as belonging to an ATC group <sup>6</sup> . - if yes give the ATC group (level 3 or more to the level that can be defined) of the applicable authorised codes in the ATC code field in D.2 of this form	<input type="checkbox"/>	<input type="checkbox"/>
Other : - if yes, please specify :	<input type="checkbox"/>	<input type="checkbox"/>

<p><b>Has the use of the investigational medicinal product been previously authorised in a clinical trial conducted by the sponsor in the Community?</b></p> <p style="text-align: right;">yes <input type="checkbox"/> no <input type="checkbox"/></p>
---

<p><b>Has the investigational medicinal product been designated in this indication as an orphan drug in the Community ?</b></p> <p style="text-align: right;">yes <input type="checkbox"/> no <input type="checkbox"/></p> <p><b>If yes, give the orphan drug designation number<sup>7</sup> :</b></p>
--

## D.2. DESCRIPTION OF THE INVESTIGATIONAL MEDICINAL PRODUCT

<p><b>Product name where applicable<sup>8</sup> :</b></p> <p><b>Product code where applicable<sup>9</sup> :</b></p> <p><b>Name of each active substance (INN or proposed INN if available, specify whether proposed or approved INN) :</b></p> <p><b>Other available name for each active substance (CAS, current sponsor code(s), other descriptive name, etc : provide all available) :</b></p> <p><b>ATC code, if officially registered<sup>10</sup>:</b></p> <p><b>Pharmaceutical form (use standard terms) :</b></p> <p><b>Route of administration (use standard terms) :</b></p> <p><b>Strength (specify all strengths to be used) :</b></p> <ul style="list-style-type: none"> <li>- Concentration (number) :</li> <li>- Concentration unit :</li> <li>- Concentration type (“exact number”, “range”, “more than” or “up to”).</li> </ul>
--

<sup>7</sup> according to the Community register on orphan medicinal products (Regulation (EC) n° 141/2000) : <http://pharmacos.eudra.org/F2/register/orphreg.htm>

<sup>8</sup> In the absence of a tradename, this is the name routinely used by sponsor to identify the IMP in the CT documentation (protocol, IB...)

<b>Type of medicinal product</b>	
<b>Does the investigational medicinal product contain an active substance :</b>	
- of chemical origin ?	yes <input type="checkbox"/> no <input type="checkbox"/>
- of biological / biotechnological origin <sup>11</sup>	yes <input type="checkbox"/> no <input type="checkbox"/>
<b>Is this :</b>	
- a cell therapy medicinal product <sup>11</sup> ?	yes <input type="checkbox"/> no <input type="checkbox"/>
- a gene therapy medicinal product <sup>11</sup> ?	yes <input type="checkbox"/> no <input type="checkbox"/>
- a radiopharmaceutical medicinal product ?	yes <input type="checkbox"/> no <input type="checkbox"/>
- an immunological medicinal product (such as vaccine, allergen, immune serum) <sup>11</sup> ?	yes <input type="checkbox"/> no <input type="checkbox"/>
- a herbal medicinal product?	yes <input type="checkbox"/> no <input type="checkbox"/>
- a homeopathic medicinal product?	yes <input type="checkbox"/> no <input type="checkbox"/>
- a medicinal product containing genetically modified organisms <sup>11</sup> ?	yes <input type="checkbox"/> no <input type="checkbox"/>
• If yes,	
▪ Has the authorisation for contained use or release been granted?	yes <input type="checkbox"/> no <input type="checkbox"/>
▪ Or is it pending?	yes <input type="checkbox"/> no <input type="checkbox"/>
- another type of medicinal product?	yes <input type="checkbox"/> no <input type="checkbox"/>
• If yes, specify :	

### **D.3. BIOLOGICAL / BIOTECHNOLOGICAL INVESTIGATIONAL MEDICINAL PRODUCTS INCLUDING VACCINES**

<b>Type of product</b>	
- Extractive	yes <input type="checkbox"/> no <input type="checkbox"/>
- Recombinant	yes <input type="checkbox"/> no <input type="checkbox"/>
- Vaccine	yes <input type="checkbox"/> no <input type="checkbox"/>
- GMO	yes <input type="checkbox"/> no <input type="checkbox"/>
- Plasma derived products	yes <input type="checkbox"/> no <input type="checkbox"/>
- Others	yes <input type="checkbox"/> no <input type="checkbox"/>
If others, specify :	

### **D.4. SOMATIC CELL THERAPY INVESTIGATIONAL MEDICINAL PRODUCT (NO GENETIC MODIFICATION)**

<b>Origin of cells</b>	
- autologous	yes <input type="checkbox"/> no <input type="checkbox"/>
- allogeneic	yes <input type="checkbox"/> no <input type="checkbox"/>
- Xenogeneic	yes <input type="checkbox"/> no <input type="checkbox"/>
- if yes, specify species of origin :	

<sup>9</sup> In the absence of a tradename, this is a code designated by the sponsor which represents the name routinely used by the sponsor to identify the product in the CT documentation. This code is potentially used in the case of combinations of drugs or drugs and devices.

<sup>10</sup> Available from the Summary of Product Characteristics

<sup>11</sup> Complete also sections D3, D4 or D5

<b>Type of cells</b>	
- Stem cells	yes <input type="checkbox"/> no <input type="checkbox"/>
- Differentiated cells	yes <input type="checkbox"/> no <input type="checkbox"/>
If yes, specify the type (e.g. keratinocytes, fibroblasts, chondrocytes,...) :	
- Others :	yes <input type="checkbox"/> no <input type="checkbox"/>
If others, specify :	

#### D.5. GENE THERAPY INVESTIGATIONAL MEDICINAL PRODUCTS

<b>Gene(s) of interest :</b>
------------------------------

<b>In vivo gene therapy:</b> <input type="checkbox"/>	<b>Ex vivo gene therapy :</b> <input type="checkbox"/>
---	--

<b>Type of gene transfer product</b>	
- Nucleic acid (e.g. plasmid) :	<input type="checkbox"/> yes <input type="checkbox"/> no
If yes, specify	
- if naked :	<input type="checkbox"/> yes <input type="checkbox"/> no
- or complexed :	<input type="checkbox"/> yes <input type="checkbox"/> no
- Viral vector :	<input type="checkbox"/> yes <input type="checkbox"/> no
If yes, specify the type : adenovirus, retrovirus, AAV, ...:	
- Others :	<input type="checkbox"/> yes <input type="checkbox"/> no
If others, specify :	

<b>Genetically modified cells :</b>	<input type="checkbox"/> yes <input type="checkbox"/> no
If yes, specify :	
- origin of the cells :	
- autologous :	<input type="checkbox"/> yes <input type="checkbox"/> no
- allogeneic :	<input type="checkbox"/> yes <input type="checkbox"/> no
- xenogeneic :	<input type="checkbox"/> yes <input type="checkbox"/> no
- if yes, specify species of origin :	
- type of cells (hematopoietic stem cells, ...) :	

#### E. INFORMATION ON PLACEBO (if relevant) (repeat as necessary)

This refers to Placebo number: (.....)	
Is there a placebo:	<input type="checkbox"/> yes <input type="checkbox"/> no
Which IMP is it a placebo for?	Specify IMP Number(s) from D
Pharmaceutical form :	
Route of administration :	
Composition, apart from the active substance(s) :	
- is it otherwise identical to the IMP?	<input type="checkbox"/> yes <input type="checkbox"/> no
- if not, specify major ingredients :	

## F. AUTHORISED SITE RESPONSIBLE FOR THE RELEASE OF THE INVESTIGATIONAL MEDICINAL PRODUCT IN THE COMMUNITY

This section is dedicated to **finished** investigational medicinal products, i.e. medicinal products randomised, packaged, labelled and released for use in the clinical trial. If there is more than one site or more than one IMP is released, use extra pages and give each IMP its number from D or E for any placebo. In the case of multiple sites indicate the product released by each site.

**Who is responsible in the Community for the release of the finished IMP? (please tick the appropriate box) :**

**This site is responsible for release of (specify the number(s) from D of the IMP and E for the placebo concerned) : .....**

- Manufacturer   
- Importer   
- Both manufacturer and importer

- Name of the organisation:  
- Address :  
  
- Please, give the manufacturer or importer authorisation number :  
If no authorisation, give the reasons :  
  
- Has the site been inspected by the Community authorities? yes  no   
If yes, date of the last inspection:

## G. GENERAL INFORMATION ON THE TRIAL

**Medical condition or disease under investigation**  
Specify the medical condition (free text) :  
ICD classification code<sup>12</sup> :  
MedDRA classification code<sup>13</sup> :  
Is it a rare disease<sup>14</sup> ? yes  no

**Objective of the trial**  
Main objective :  
  
Secondary objectives :

**Principal inclusion criteria** (list the most important)

**Principal exclusion criteria** (list the most important)

**Primary end point(s) :**

<sup>12</sup> Source : World Health Organization

<sup>13</sup> The information on the ICD and MedDRA classification is optional. When both classifications are available only one should be provided; in this case applicants are encouraged to provide the MedDRA classification.

<sup>14</sup> Points to consider on the calculation and reporting of the prevalence of a condition for Orphan drug designation : COM/436/01 ([www.emea.eu.int/hums/human/comp/orphaapp.htm](http://www.emea.eu.int/hums/human/comp/orphaapp.htm))

## H. POPULATION OF TRIAL SUBJECTS

<b>Age</b>			
Age span	<input type="checkbox"/> Less than 18 years If yes specify: <input type="checkbox"/> In Utero <input type="checkbox"/> Preterm Newborn Infants (up to gestational age ≤ 37 weeks) <input type="checkbox"/> Newborn (0-27 days) <input type="checkbox"/> Infant and toddler (28 days - 23 months) <input type="checkbox"/> Children (2-11 years) <input type="checkbox"/> Adolescent (12-17 years)	<input type="checkbox"/> Adult (18-65 years)	<input type="checkbox"/> Elderly (> 65 years)
<b>Gender</b>			
<input type="checkbox"/> Female <input type="checkbox"/> Male			

<b>Population of trial subjects</b>		
Healthy volunteers	yes <input type="checkbox"/>	no <input type="checkbox"/>
Patients	yes <input type="checkbox"/>	no <input type="checkbox"/>
Specific vulnerable populations		
- women of child bearing potential	yes <input type="checkbox"/>	no <input type="checkbox"/>
- pregnant women	yes <input type="checkbox"/>	no <input type="checkbox"/>
- nursing women	yes <input type="checkbox"/>	no <input type="checkbox"/>
- emergency situation	yes <input type="checkbox"/>	no <input type="checkbox"/>
- subjects incapable of giving consent personally	yes <input type="checkbox"/>	no <input type="checkbox"/>
- others :	yes <input type="checkbox"/>	no <input type="checkbox"/>
	If yes, specify :	
	If yes, specify :	

<b>Planned number of subjects to be included :</b>
- in the Member State
For a multinational trial:
- in the Community
- in the whole clinical trial

<b>Plans for treatment or care after the subject has ended the participation in the trial<sup>18</sup> (if it is different from the expected normal treatment of that condition) :</b>
Please specify :

## I. PROPOSED CLINICAL TRIAL SITES IN THE MEMBER STATE CONCERNED BY THIS REQUEST

<b>I.1 Co-ordinating investigator (for multicentre trial) and principal investigator (for single centre trial)</b>			
Name	Surname	Qualification (MD.....)	Address

<sup>16</sup> if not provided in the protocol

<sup>17</sup> from the 1<sup>st</sup> inclusion until the last visit of the last subject

<sup>18</sup> if not already provided in the protocol

<b>I.2. Principal investigators (for multicentre trial ; where necessary, use other forms)</b>			
Name	Surname	Qualification (MD.....)	Address of the principal investigator site

<b>I.3. Central technical facilities to be used in the conduct of the trial (laboratory or other technical facility), in which the measurement or assessment of the main evaluation criteria are centralised (repeat as needed for multiple organisations)</b>
Organisation: Name of contact person : Address : Telephone number : Duties subcontracted :

<b>I.4. Organisations to whom the sponsor has transferred trial related duties and functions (repeat as needed for multiple organisations)</b>
Has the sponsor transferred any major or all the sponsor's trial related duties and functions to another organisation or third party? <div style="text-align: right;">yes <input type="checkbox"/> no <input type="checkbox"/></div>
If yes, specify : Organisation : Name of contact person : Address : Telephone number : Duties / functions subcontracted :

**J. COMPETENT AUTHORITY / ETHICS COMMITTEE IN THE MEMBER STATE CONCERNED BY THIS REQUEST**

If this application is addressed to the competent authority, please tick the Ethics Committee box and give information on the Ethics committee concerned and viceversa			
<b>Competent authority</b>	<input type="checkbox"/>		
<b>Ethics Committee</b>	<input type="checkbox"/>		
<b>Name and address :</b>			
Date of submission :			
Authorisation/ opinion :	<input type="checkbox"/> to be requested	<input type="checkbox"/> pending	<input type="checkbox"/> given
If given, specify:	Date of authorisation / opinion:		
	<input type="checkbox"/> authorisation accepted / opinion favourable:		
	<input type="checkbox"/> not accepted / not favourable.		
	If not acceptable / not favourable, give :		
	- the reasons		
	- the eventual anticipated date of resubmission :		

**L. SIGNATURE OF THE APPLICANT IN THE MEMBER STATE**

I hereby confirm that /confirm on behalf of the sponsor that (delete which is not applicable)

- the above information given on this request is correct
- the trial will be conducted according to the protocol, national regulation and the principles of good clinical practice
- it is reasonable for the proposed clinical trial to be undertaken.
- I will submit a summary of the final study report to the competent authority and the ethics committee concerned within a maximum 1 year deadline after the end of the study in all countries.
- I will declare the effective date of the commencement<sup>19</sup> of the trial to the competent authority and Ethics Committee concerned as soon as available.

APPLICANT of the request for the competent authority(as stated in section C1) :

Date :  
Signature :  
Print name:

APPLICANT of the request for the Ethics committee (as stated in section C2) :

Date :  
Signature :  
Print name:

---

<sup>19</sup> inclusion of the 1<sup>st</sup> patient in the Member State (the inclusion starts with the informed consent signature)

## **K. CHECK LIST OF THE INFORMATION APPENDED TO THE APPLICATION FORM**

**(Information that each Member State's CA and Ethics Committees require according to the table in Attachment 1)**

### **EC CA<sup>20</sup>**

- Receipt of confirmation of EudraCT number
- Covering letter
- Application form
- Disk with XML file for EudraCT
- Protocol with all current amendments
- Investigator's brochure
- Investigational Medicinal Product Dossier (IMPD)
- Simplified IMPD for known products
- Summary of Product Characteristics (SmPC) (for products with marketing authorisation in the Community)
- List of Competent Authorities in the Community to which the application has been submitted and details of decision
- Copy of Ethics Committee opinion in the MS concerned where available

### **ADDITIONAL INFORMATION FOR SPECIAL SITUATIONS**

- If the applicant is not the sponsor, a letter of authorisation enabling the applicant to act on behalf of the sponsor
- Copy of authorisation for contained use or release of genetically modified organisms (when applicable and available)

### **ADDITIONAL INFORMATION ACCORDING TO MEMBER STATE REQUIREMENTS**

*(Attachment 1 shows the information that each Member State's CA and ethics committees require)*

#### **Subject related**

- Informed consent form
- Subject information leaflet
- Arrangements for recruitment of subjects

#### **Protocol related**

- Summary of the protocol in the national language
- Outline of all active trials with the same IMP
- Peer review of the trial when available
- Ethical assessment made by the principal/co-ordinating investigator

#### **IMP related**

- Viral safety studies
- Examples of the label in the national language
- Applicable authorisations to cover trials or products with special characteristics (if available) eg GMO, radiopharmaceuticals products
- TSE Certificate when applicable
- Declaration of GMP status of active biological substance
- Copy of the manufacturer authorization referred to in Art. 13.1. of the Directive stating the scope of this authorization if the IMP is manufactured in the EU
- Declaration of the qualified person that the manufacturing site works in compliance with EU GMP (when applicable)
- Copy of the importer authorization as referred to in Art. 13.1. of the Directive
- Certificate of analysis for test product in exceptional cases : where impurities are not justified by the specification or when unexpected impurities (not covered by specification) are detected

#### **Facilities and staff related**

- Facilities for the trial
- CV of the coordinating investigator in the MS concerned (for multicentre trials)
- CV of each investigator responsible for the conduct of a trial in a site in the MS concerned (principal investigator)
- Information about the supporting staff
- Information on the contact person as referred to in Art 3.4 of the Directive (to be provided in the patient information sheet)

#### **Finance related**

- Provision for indemnity or compensation in the event of injury or death attributable to the clinical trial
- Any insurance or indemnity to cover the liability of the investigator and sponsor
- Compensation to investigators
- Compensation to subjects
- Agreement between sponsor and trial sites
- Certificate of agreement between sponsor and investigator when not in the protocol
- Agreement between the investigators and the trial sites

<sup>20</sup> Tick all boxes to show information provided to the ethics committee concerned (EC) and the competent authority (CA).

**Annex 2: Notification of Amendment Form**

**REQUEST FOR AUTHORISATION OF A SUBSTANTIAL AMENDMENT TO A CLINICAL TRIAL ON A MEDICINAL PRODUCT FOR HUMAN USE TO THE COMPETENT AUTHORITIES AND FOR OPINION OF THE ETHICS COMMITTEES IN THE COMMUNITY**

*For official use:*

Date of receiving the request :	Grounds for non acceptance/ negative opinion : yes <input type="checkbox"/> <input type="checkbox"/> no If yes, date :
Date of start of procedure:	Authorisation/ positive opinion : yes <input type="checkbox"/> <input type="checkbox"/> no Date :
Competent authority/Ethics committee registration number of the trial :	

*To be filled in by the applicant:*

This form is common for request for authorisation from the Competent Authority and for the opinion from an Ethics Committee. Please indicate the relevant purpose in a box.

**Member state in which the amendment is being submitted:**

**REQUEST FOR AUTHORISATION TO THE COMPETENT AUTHORITY:**                     

**REQUEST FOR OPINION OF THE ETHICS COMMITTEE:**   

**NOTIFICATION FOR INFORMATION ONLY:**

- to the competent authority
- to the Ethics committee

*A 1. TRIAL IDENTIFICATION (When the amendment concerns more than one trial, repeat this form as necessary.)*

Eudract number:

  

Full title of the trial :

  

Sponsor's protocol code number, version, and date:

**A 2. AMENDMENT IDENTIFICATION**

Amendment to 'protocol'                       If checked specify sponsor's amendment code number, version, date:

Amendment to 'initial request for authorisation'  If checked specify sponsor's amendment code number, version, date:

**B. IDENTIFICATION OF THE SPONSOR RESPONSIBLE FOR THE REQUEST**

**B 1. Sponsor**

Organisation:  
 Name of person to contact:  
 Address :  
 Telephone number :  
 Fax number :  
 e-mail:

**B 2. Legal representative <sup>2</sup> of the sponsor in the Community for the purpose of this trial (if different from the sponsor)**

Organisation:  
 Name of person to contact:  
 Address :  
 Telephone number :  
 Fax number :  
 e-mail:

**C. APPLICANT IDENTIFICATION, (please tick the appropriate box)**

<b>C1. Request for the competent authority</b>	<input type="checkbox"/>	<b>C2. Request for the Ethics Committee</b>	<input type="checkbox"/>
- Sponsor	<input type="checkbox"/>	- Sponsor	<input type="checkbox"/>
- Legal representative of the sponsor	<input type="checkbox"/>	- Legal representative of the sponsor	<input type="checkbox"/>
- Person or organisation authorised by the sponsor to make the application. In that case, complete below:	<input type="checkbox"/>	- Person or organisation authorised by the sponsor to make the application. In that case, complete below:	<input type="checkbox"/>

		- Investigator in charge of the application :	
		- Coordinating investigator (for multicentre trial)	<input type="checkbox"/>
		- Principal investigator (for single centre trial)	<input type="checkbox"/>
		In the case of the investigator, complete below :	
		- Name :	
		- Address :	
		- Telephone number :	
		- Fax number :	
		- E-mail :	

<sup>2</sup> :as stated in article 19 of Directive 2001/20/EC

**D. TYPE OF AMENDMENT (please tick the appropriate box)**

This amendment concerns mainly urgent safety measures already implemented	yes <input type="checkbox"/> no <input type="checkbox"/>
Reasons for the amendment:	
Changes in safety or integrity of trial subjects	yes <input type="checkbox"/> no <input type="checkbox"/>
Changes in interpretation of scientific documents/value of the trial	yes <input type="checkbox"/> no <input type="checkbox"/>
Changes in quality of IMP(s)	yes <input type="checkbox"/> no <input type="checkbox"/>
Changes in conduct or management of the trial	
Change or addition of site, principal investigator(s), co-ordinating investigator	yes <input type="checkbox"/> no <input type="checkbox"/>
Change of sponsor, legal representative, applicant	yes <input type="checkbox"/> no <input type="checkbox"/>
Change in transfer of major trial related duties	yes <input type="checkbox"/> no <input type="checkbox"/>
Other change	<i>If yes, specify:</i> yes <input type="checkbox"/> no <input type="checkbox"/>
Other case	<i>If yes, specify</i> yes <input type="checkbox"/> no <input type="checkbox"/>
Content of the amendment:	
an amendment to information in the application form	yes <input type="checkbox"/> no <input type="checkbox"/>
an amendment to the protocol	yes <input type="checkbox"/> no <input type="checkbox"/>
an amendment to other appended documents	yes <input type="checkbox"/> no <input type="checkbox"/>
Other case	<i>If yes, specify :</i> yes <input type="checkbox"/> no <input type="checkbox"/>

**E. REASONS FOR AMENDMENT (one or two sentences):**

**F. BRIEF DESCRIPTION OF THE CHANGES:**

**G. LIST OF THE DOCUMENTS APPENDED TO THE NOTIFICATION FORM**

Please submit only relevant documents and/or when applicable make clear references to the ones already submitted. Make clear references to any changes of separate pages and submit old and new texts. Tick the appropriate box(es).

<input type="checkbox"/> Covering letter stating the type of amendment and the reason(s)
<input type="checkbox"/> Summary of the proposed amendment
<input type="checkbox"/> List of modified documents (identity, version, date)
<input type="checkbox"/> If applicable, pages with previous and new wording
<input type="checkbox"/> Supportive information
<input type="checkbox"/> When applicable, revised XML file and copy of initial application form with amended data highlighted

**I. SIGNATURE OF THE APPLICANT IN THE MEMBER STATE**

I hereby confirm that/ confirm on behalf of the sponsor that (delete which is not applicable)

- the above information given on this request is correct
- the trial will be conducted according to the protocol, national regulation and the principles of good clinical practice
- it is reasonable for the proposed amendment to be undertaken.

	- E-mail :

### End of trial

				Date of the end of trial (YYYY/MM/DD):
- Is it the end of the trial in this Member State?	yes o	no o	-- / -- / --	
- Is it the end of the complete trial in all countries concerned by the trial?	yes o	no o	-- / -- / --	

Is it a premature ending of the trial?	yes o	no o	
Is it a temporary halt of the trial?	yes o	no o	
If yes, complete following boxes:			
• What is(are) the reason(s) for the halt or premature ending?			
- Safety	yes o	no o	
- lack of efficacy	yes o	no o	
- the trial has not commenced	yes o	no o	
- other	yes o	no o	
if yes, specify :			

- Number of patients still receiving treatment at time of halting or premature termination in the MS concerned by the declaration :
- And briefly describe in an annex (free text):
  - the justification for a halt or premature ending of the trial
  - the proposed management of patients receiving treatment at time of the halt or of study termination
  - the consequences of early termination for the evaluation of the results and for overall risk benefit assessment of the investigational medicinal product.

I hereby confirm that/confirm on behalf of the sponsor that (delete which is not applicable)

- the above information given on this declaration is correct
- that a summary of the clinical trial report will be submitted to the competent authority and ethics committee concerned as soon as available and within a 1 year deadline after the end of the trial in all countries.
